ISSUE FOUNDED

1.SHOW UNTICKED MODULES CHECK BOX AS BLANK IN UI
case occurs when selecting all in a group and then manually untick all some of the child items and then save.
this makes the group selection to true. while reloading the module the function checks if all the value of selection is true and makes the selection box ticked.
in this case as group's selection value is true it will make all the child values to appear ticked. Expected behavior is only show saved selected items

#18 - 11/20/2024 06:55 PM - Arathy PS

NEW CHANGES
----
1. Two combo select box with options,
Own Favorite Menu (default)
Own Quick Access Menu
2. quick access menu
--- add separation with a line
--- No need groups, just modules
--- The lines shouldn't be editable
3. After setting only that should be shown in the quick access menu.
