1. **Against Sale** - Mentioned in Redmine No. 435 (DB) -> Issue no 1.
Can't perform against sale case :
A Ticket/Voucher AP Shared in Sale to Party A, Party B then done against sale once for Party A. then we can't do against sale that Ticket/Voucher for Party B.
Since we have only 1 record in 'tbl_supp_doc_no' table for a ticket/voucher, we can do only 1 against sale for 1 'tbl_supp_doc_no' record.
Solution : Change against sale connection to modofsale table
